RE: Site Inspection, Golden Rule Mining Co., Golden Rule Special Mine, S/047/038 (State Lease #39177), Uintah County, Utah

Date of Inspection: May 20, 1992
Time of Inspection: 1445 - 1515
Conditions: Overcast, cool
Participants: Tony Gallegos, DOGM

The purpose of this inspection was to evaluate the current status of the mine site. Division files do not contain record of any inspection since the NOI was filed in 1989.

The mine site appeared to be in a state of suspension. There was no sign of recent work at the mine site (if this location was correct). There are several gravel piles and miscellaneous mining equipment/debris on the site. A feed hopper/grizzly piece of equipment is one easily identifiable landmark at this site. There is a power line spur which runs to a power pole and transformer located on the site. An old power distribution center is near the power pole. A visual estimate of the disturbed area would be 3-3.5 acres. This estimate would include all gravel piles, equipment, etc. Photographs were taken to document the current status of the site.
